

Year 5 Parent narrative – Summer 1 2022

We are teaching subjects in a more discrete way to ensure we are building our knowledge in each subject. Here is a glimpse of some of the learning we will be completing this half term to grow our brains further!

Geography

In our geography learning, we will learn all about India. We will look at the physical and human geography, including identifying its location on a map, the biomes and learning about the economy.

PSHE

In PSHE, we are studying healthy relationships, including the relationship with ourself. We will be learning all about a healthy body image, self-esteem and how we can be proud of ourselves.

History

In history, we will be learning all about how crime and punishment has changed over time and whether punishment has always been fair for everyone in society. We will consider equality and fairness under the law from the Viking age in Britain to our modern day.

Art

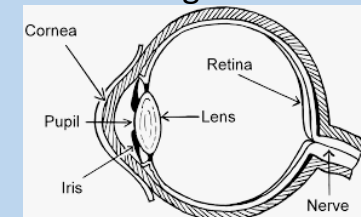

This half term we focus on sculpture using the medium of clay.

Religious Education, Philosophy and ethics

In our religious education studies, we will learn about the key events in the Christian calendar and why they are of significance. We will also compare Judaism, Islam and Christianity and look for any similarities in worship.

Science

In our science learning, we will learn about the human eye and how we see. We will also learn about the human ear and how we hear, thinking about different pitches and sounds. We will also learn how to create and debug circuits.

Thank you for your continued support.
