

Year 2 Parent narrative – Summer 1 2022

We are teaching subjects in a more discrete way to ensure we are building our knowledge in each subject. Here is a glimpse of some of the learning we will be completing this half term to grow our brains further!

Computing

We will be learning about multimedia and how we can present information in different ways. We are working on creating our own powerpoint presentations adding text, images and sound.

PSHE

In PSHE we will be developing our work on relationships and looking at the friendships we have and how sometimes people might fall out. We will focus on how we can deal with friendships.

History

We are continuing our learning on significant people in history. This half term we focus on Grace Darling and how she achieved great fame for the part she played in the rescue of survivors from a wrecked merchant ship in 1838

Art

This half term we focus on sculpture using the medium of clay.

Religious Education, Philosophy and ethics

As part of work on learning about world wide festivals and celebrations we will be finding out more about Ramadan and Eid and why people of the Islamic faith celebrate these.

Science

We are focussing on the technology strand of forces, light and sound. We will also be developing our scientific enquiry elements by using scientific equipment to measure and compare information.

Thank you for your continued support.
