## Phoneme of the week

p

## Aaaargh Spider

Our featured text this week was "Aaaargghh Spider".

We talked about how we feel about spiders and counted different parts of the spider. We know that spiders have 8 hair legs to help them crawl! We explored number skills by counting the different amounts of spiders and matching them to numerals.

What a busy week we had! We have enjoyed exploring clay in the tactile area. The children used some fantastic vocabulary to describe the texture of the clay as they modelled with it. We also swept away the cobwebs from our home corner and we enjoyed catching spiders in the water area. This was tricky because it was wrapped

up in a spider web!

We explored numbers 3 and 4 in more depth this week. We looked at different ways to represent these numbers and tried to find them during our play.

I am not scared of spiders. I am brave.
