

# Careers in English

## September 2023

CAREER AND ASPIRATION

Take part in a discussion and activity about different careers

Research different careers of significant people

Take part in an interview process

### Published Poets!

Children in Year 5 created their own poetry which was published in a spoken word poetry anthology!

### Editors

At Rawmarsh Ashwood, we have our own newspaper. Throughout the year, we write, edit and publish our newspaper reporting on what is happening throughout school.

Welcome to The Ashwood Press, our school newspaper - written by the children of Rawmarsh Ashwood. We hope you enjoy reading all about what we have been up to recently.

**FS1**  
In Foundation 1, we have been learning about creepy crawly bugs like snails and spiders.

**Year 1**  
We are going to go to the farm to celebrate our wonderful learning. We've been learning about different animals: cows, sheep and horses. We are really looking forward to seeing the animals especially the cows.

**Year 2**  
In Year 2, we have been working hard for our SATs tests. They were OK - we tried so hard and feel proud of ourselves. In Art, we have been doing portraits of ourselves in pencil. We used a mirror to help us draw them. In Science, we have been learning about light. It was really exciting when we created circuits and made the bulb light up!

**Year 3**  
We think Rawmarsh Ashwood is a very good place to learn because of the amazing teachers and the subjects we learn like English, Maths and Art. In English, we've been writing a letter to Rishi Sunak to ask if the school week can be 4 days long. In History, we've been learning about Ancient Greece. In Science, we've been learning about how sound travels. It has been so much fun!

**Year 4**  
Last half term, we loved it when we did the DT project and made boats with a propeller that actually worked! We also loved it when it was French Day and we got to do tennis, eat French food and draw the Eiffel Tower. Some children from our class went to the library for the King for a Day competition. There was a buffet, activities and a treasure hunt which was amazing!

**Year 5**  
In class, we have been learning about the Roman 13 in reading. We did a newspaper report in English. We have been doing long multiplication and short division. We are learning about L.L. Long and perspective in art. We looked at the industrial revolution in history and it was really interesting. In Geography, we have been learning about South America and how climate change can affect the rainforests.

**Year 6**  
In our class, we have been doing science and had STEM university people come in and explain about the world and environment. We also did an experiment with balloons, yeast and sugar. In geography, we learned about natural disasters and how hurricanes have an eye that's the calmest part of it. One day, we did First Aid and we learned about what to do when someone is dying and how we can help them. A couple weeks ago, our class went to Scarborough and we went bowling and had ice cream, it was a blast!

### Author Visits

We have been very lucky to have a range of authors in to talk about their books and how the writing process takes place. This month, we've already welcomed the fantastic Jenny York in to school who shared her incredible stories with us.

We enjoyed dressing up as the cat and the fairy from one of Jenny York's books. We acted out a story to the rest of KS1. It was really good fun.

**Vienna and Israel - Year 2**

I enjoyed our author visit - I liked how funny it was. We learnt all about her different stories. My favourite books of Jenny York's is called Nuts!

**Scarlett - Year 5**
